

The ELLA RESORTS overall operation located in Rhodes is governed by the principles reflected in the Information Security Management System (ISMS). ISMS is based on the requirements and specifications set by the international standard ISO27001: 2013.

The fundamental philosophy and the primary concern of ELLA RESORTS, through the implementation of the Information Security management system, is the provision of hotel services that meet the needs and expectations of its customers and their growing requirements.

The Information Security Policy focuses on:

- protection of the computer resources, personal privacy and the moving information of the company from any threat, internal or external, intentional or accidental
- ensuring the confidentiality, integrity and availability of information
- business continuity, ensuring sustainability, competitiveness and image in the business world
- systematic risk assessment and response
- archiving data, preventing viruses and external intrusions, controlling access to systems, recording all security incidents and managing unexpected developments
- continuous information of the administration and the staff in matters of information security and the conduct of training seminars for the staff
- continuous and systematic control and improvement of the Information Security Management System.

This Information Security Policy is published and communicated to all employees in the Company as well as to all external partners and all interested parties.

The Managing Director
