

INFORMATION SECURITY POLICY

Ella Resorts overall operation located in Rhodes is managed by the principles of the Information Security Management System (ISMS). ISMS is based on the requirements and specifications set by the international standard ISO27001: 2013.

The fundamental philosophy and the primary concern of Ella Resorts, through the implementation of the Information Security management system, is to provide hotel services that meet the needs and expectations of its customers, and their growing demands.

The Information Security Policy focuses on:

- The data protection of the company's computers, personal privacy, as well as the transferring information of the company free from any threat, internal or external, intentional or accidental
- ensuring the confidentiality, integrity and availability of information
- business continuity, ensuring sustainability, competitiveness and image in the business world
- systematic risk assessment and response
- data archiving, virus and external intrusions prevention, system access control, recording of all security incidents and management of unexpected developments
- continuous updating of management and the staff on information security issues, as well as the conduct of training seminars for the staff
- continuous and systematic control and improvement of the Information Security Management System.

This Information Security Policy is published and communicated to all employees in the Company as well as to all external partners and all interested parties.
